6. Frequently asked questions

What is matcha?

Matcha is finely ground green tea powder traditionally prepared by whisking it with water. It can also be used in lattes, smoothies, desserts, and other recipes.

How do you prepare matcha powder?

Sift or add the powder to a bowl, combine it with warm water, and whisk until smooth and evenly mixed. Adjust the amount of water to suit your taste.

Can I use Kavumi Matcha to make a latte?

Matcha powder can be used to prepare hot or iced lattes. Mix the powder with a small amount of warm water before adding your preferred milk. Check the product's preparation recommendations for the best results.

What is the difference between ceremonial and culinary matcha?

These terms are commonly used to describe different intended uses and product positioning. Their meanings can vary between sellers, so review the producer's specifications, intended preparation, and ingredient information rather than relying on the label alone.

How should I store matcha powder?

Follow the storage directions on your Kavumi product packaging. In general, protect matcha from heat, moisture, air, and direct light, and keep the container securely closed.

Is matcha the same as regular green tea?

Both come from the tea plant, but they are prepared differently. Matcha is made from finely ground tea leaves consumed as a powder mixed into liquid, while conventional green tea is typically steeped and the leaves are removed.

Does Kavumi Matcha contain caffeine?

Matcha naturally contains caffeine. The amount in a serving depends on factors such as the powder used and serving size. Refer to verified product information for any specific caffeine figures.

Where does Kavumi Matcha come from?

Kavumi's product origin should be stated using verified supplier and product documentation. See the product details for the confirmed country or region of origin.
